

# First Aid for Your Best Friend.

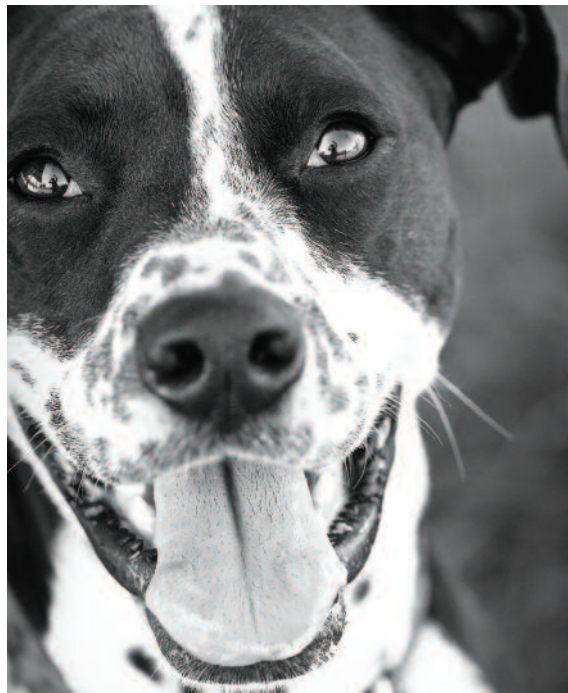

Photo © H2Meyer Photography

VCA-Northwest Veterinary Specialists presents a Red-Cross certified hands-on lab and lecture to learn everything you need to know about canine/feline first aid. This will include a CPR and bandaging demo/lab as well as an open forum for questions. We will discuss common emergencies including heat stroke, bloat, and brachycephalic airway syndrome as well as the 5 most frequent toxicities that we see in the ER. Each participant will receive a CPR certificate.
